

THE NEW MESSAGE FROM GOD

In 1983, a series of profound messages were received by a man of no particular reputation or professional importance. In the 25 years since, this transmission has continued, growing ever wider in scope. Now over 8000 pages in length, it has revealed itself to be a New Message from God for humanity. This New Message has begun to move across the world, through many cultures and languages.

Today, the voice of revelation continues to speak through its messenger Marshall Vian Summers, revealing what has never been seen or known before on Earth.

5 PURPOSES OF THE NEW MESSAGE FROM GOD

- To alert, strengthen and prepare humanity for the Great Waves of change
- To alert, strengthen and prepare humanity for its encounter with a Greater Community of intelligent life
- To bring into the world a new understanding of religion and spirituality at the level of Knowledge
- To bring into the world Wisdom from the Greater Community and the understanding of Greater Community Spirituality
- To provide a Revelation about humanity's future and destiny both within this world and within a Greater Community of intelligent life

GOD'S NEW MESSAGE FOR THE WORLD

- Humanity is facing converging Great Waves of change which include, environmental decline, diminishing resources, climate change, economic and political instability and the resulting risk of competition, conflict and war.
- Humanity is facing competition and intervention from alien races from beyond the world who are here to take advantage of a weak and divided humanity.
- Humanity must cease its endless conflicts in order to unite and prepare to meet these two great challenges.

- The religions of the world were all initiated by God and must now unite in order to prepare the people of the world.
- The New Message is not here to compete with the world's religions but to give them a broader vision and a new hope so that their contributions to humanity may grow and be relevant in a changing world.
- Humanity has allies in the Universe who are not intervening in human affairs, but who instead have sent their wisdom to educate humanity about the realities of life in the universe and the steps that must be taken to offset the Intervention that is occurring in the world today.
- Humanity has a destiny to become a free and independent race in the Universe. But in order to achieve this, it must be united, self-sufficient and extremely discreet.
- Humanity must establish its own Rules of Engagement and Ethics of Contact regarding all present and future visitation to the Earth.
- Humanity will need new Knowledge and Wisdom in order to rescue human civilization in a declining world and to prepare for the complexities of life in the Universe.

GOD'S NEW MESSAGE FOR THE INDIVIDUAL

- Each person was sent into the world for a greater purpose to make a specific contribution to a world in need. The discovery and expression of this greater purpose represents both redemption and fulfillment in life.
- Humanity is endowed by God with a deeper intelligence called Knowledge that is distinct from our normal state of mind. Knowledge was instilled in each person to protect and guide them and to prepare them to find and fulfill their greater purpose in the world. Knowledge will play a defining role in determining humanity's future.
- The plight of people everywhere represents the need for Knowledge to be discovered by many people in order to tip the balance away from disaster towards a new way forward for humanity.
- Each person is meant to experience relationships representing a higher purpose in life. With the discovery of Knowledge, such relationships are destined to occur.
- Each person must build the Four Pillars of their life: the Pillar of Relationships, the Pillar of Work, the Pillar of Health and the Pillar of spiritual realization. Like the four legs of a table, the Four Pillars give a person balance, harmony and the strength to face even the most extraordinary and challenging events of life.
